JOHN DEERE TECHNICIAN MAJOR

Associate of Applied Science

JOB OPPORTUNITIES FOR GRADUATES

Employment of farm equipment mechanics and service technicians is projected to grow 10 percent, about as fast as the average for all occupations. Demand for farm equipment repairers will be primarily driven by the need for agricultural products to feed a growing population. Demand for other products, such as biofuels, will also increase repairer employment.

Most job opportunities will come from the need to replace workers who retire or leave the occupation. Those with certificates from vocational schools or 2-year degrees from community colleges should have very good job opportunities, as employers strongly prefer these candidates. Those without formal training will have difficulty finding jobs.

The majority of job openings are expected to be in sectors that sell, rent, or lease heavy vehicles and mobile equipment, where a large proportion of service technicians are employed.

SALARY

The median annual wage for heavy vehicle and mobile equipment service technicians was \$34,760 in May 2012. The median wage is the wage at which half the workers in an occupation earned more than that amount and half earned less.

ACCREDITATION

The John Deere Program is accredited by John Deere University.

STUDENT TESTIMONIAL

"The John Deere TECH Program at Owens gave me an excellent education in the basics of John Deere systems. I'm very fluent in both the electrical and hydraulics sides of the equipment. If there's a problem, I know where to look for the solution. The TECH Program really gave me the confidence to do this and know I could make a living at it." AH

EMPLOYER TESTIMONIAL

"The John Deere TECH Program gives a dealer a head start in making a technician profitable. A big plus is that TECH graduates come to the job with working knowledge of how to use service advisor. I can't tell you how much time that saves. And saving time is saving money. For us, TECH graduates are the future. There's no better program out there for creating service technicians"
