

# Social Benefits Perspective

## OSCC Increases State Income

- The activities of OSCC’s 2007-08 student body will generate about \$46.8 million in labor income in the state economy each year (in the aggregate).
- Once OSCC’s current students become active in the workforce, they will promote business output, raise consumer spending, and increase property income in the State. All of this contributes an additional \$27.0 million in taxable income each year.
- Altogether, higher student income and associated effects on business productivity add \$73.9 million in income annually to the state economy.

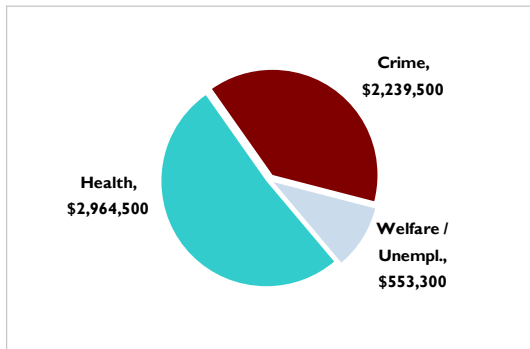

Increased Taxable Income

## OSCC Reduces Social Costs

- Education is statistically correlated with improved lifestyle behaviors, including reduced incidences of absenteeism, alcohol abuse, and smoking, lower probability of committing crime, and fewer welfare and unemployment claims.

Social Savings Attributable to OSCC

- It is estimated that OSCC’s 2007-08 student population will generate social savings equal to \$5.8 million a year, with \$3.0 million in health savings, \$2.2 million in law enforcement savings, and \$553,300 in welfare and unemployment savings.
- These savings accrue to all state and local residents—students, homeowners, businesses, and taxpayers.

EMSI is a leading provider of socioeconomic impact and strategic planning tools to community and technical colleges in the US and Canada. Visit us at [www.economicmodeling.com](http://www.economicmodeling.com) for more information. To see full documentation of the study, please contact the college.
