

Taxpayer Perspective

OSCC Leverages Taxpayer Dollars

- Around 96% of OSCC students remain in the State and contribute to economic growth. Students who enter the workforce expand the tax base by generating higher earnings and reducing social costs.
- The State of Ohio will save approximately \$910,400 in avoided social costs each year, including savings associated with improved health, lower costs of law enforcement, and reduced welfare and unemployment.
- Students enjoy higher earnings after receiving education from OSCC, thereby expanding the tax base and reducing the burden on state and local taxpayers. In the aggregate, higher student income and associated increases in property income generate about \$9.2 million in added tax revenue each year.

OSCC Generates a Return on Public Investment

Taxpayer Long-Term Investment Growth

- State government allocated about \$53.7 million in support of OSCC in FY 2007-08.
- For every dollar appropriated by state government to OSCC, taxpayers will see a return with a cumulative added value of \$3.80 in the form of higher tax revenues and avoided social costs.
- State government will receive a rate of return of 15% on their investments in OSCC.

EMSI is a leading provider of socioeconomic impact and strategic planning tools to community and technical colleges in the US and Canada. Visit us at www.economicmodeling.com for more information. To see full documentation of the study, please contact the college.
