SPRAY FINISHING TECHNOLOGY WORKSHOPS 2019

March 6–8 • May 8–10 • September 11–13 • November 6–8

Learn about a broad spectrum of spray finishing equipment and techniques applicable to many levels of experience!

Classroom Highlights
• Suction, Gravity & Pressure Feed Systems
• HVLP
• Airless
• Low & High Pressure Pumps
• Electrostatics
• Surface Preparation
• Finish Defects
• Air Filtration
• Paint Preparation
• Trends in Coating Products
• Safety & Environment
• Troubleshooting
• Maintenance

Spray Lab Highlights
• Paint Preparation
• Suction, Gravity & Pressure Spraying
• Airless Spraying
• HVLP Spraying
• Gun Maintenance
• Equipment Demonstrations

Presented by:
Binks Devilbiss

A workshop for...
• Painters, Supervisors, Process Engineers & Managers
• Painting Contractors
• Spray-Painting Equipment Maintenance Personnel
• Spray-Painting Equipment Distributors
• Coating Products Suppliers

Get answers to these questions...
• How does a spray gun work?
• How do I properly set up a pressurized system?
• How do I solve equipment and finish defect problems?

Space is limited
Enroll Now!

WORKFORCE AND COMMUNITY SERVICES
P.O. Box 10,000
Toledo, OH 43699-1947
IN THE CLASSROOM...

Spray System Components
- Conventional: Suction, Gravity, Pressure Feed
- HVLP: Suction, Gravity, Pressure Feed
- Airless and Air Assisted Airless Systems: Heated, Circulating, Automatic

Conventional System Components
- Compressors
- Spray Booths
- Air Makeup
- Spray Guns
- Hoses and Connections

Surface Preparation
- Substrate Pretreatment: Metal, Wood, Plastics
- Pretreatment Defects

Theory of Atomization
- Air Cap Analysis
- Fluid Tip Analysis

Operator Technique

IN THE SPRAY LAB...

Paint Preparation
- Viscosity
- Coverage

Operation of Conventional Systems
- Suction
- Gravity

IN THE CLASSROOM...

Surface Defects
- Heaters
- Circulating Systems
- Automatic Sprayers

Air Dryer Devices
- Centrifugal
- Desiccant
- In-line

Electrostatic System Analysis
- Equipment
- Application
- Troubleshooting
- and Maintenance

Paint Line Calculations

IN THE SPRAY LAB...

Operation of HVLP Equipment
- Suction
- Pressure
- Gravity

Spray Gun Maintenance and Repair

Content of this workshop is subject to change without notice.

Workshop Information

Description: This three-day intensive workshop familiarizes participants with the equipment, systems and techniques of spray finishing. Topics include surface preparation, equipment types, evaluation and spray applications associated with industrial finishing. The latest technologies are explored. Each student has ample opportunity for hands-on application of coatings with several types of spray tools.

Location: The workshop is held at Finishing Brands, A Carlisle Company, Toledo, Ohio, easily reached by air to Toledo or Detroit, or by car via the Ohio Turnpike or Interstate 75. Start-up information, a map, hotel and transportation details will be provided to all participants.

Workshop Fee: $595 includes all instructional materials, daily lunches and lab supplies.

Lodging: A special lodging package is available to workshop participants at the Holiday Inn Express. The rate for rooms is $99 per day plus tax. Call (419) 214-4700 and refer to the SPW package plan when making reservations. Reservations must be made at least 14 days prior to the workshop date to receive discounted rate. The hotel is less than 10 minutes from the workshop site.

Hours: 8:30 a.m. to 4 p.m. daily.

Safety: A charcoal cartridge-style respirator and safety glasses must be worn during each hands-on session.

Participants may bring a proper respirator or purchase a DeVilbis MSP-521 on site for $40 (cash or check only). Safety glasses are also available. In this workshop you will be in brief contact with common finishing materials and solvents. If you have a potential health problem associated with contact with these materials or wearing a respirator, you should consult with a physician before you register.

Refunding Policy: Companies may substitute participants without penalty. Refunds for cancellation or transfer to a later workshop will be made as follows:

- 100% 0-5 working days before start date
- 50% 6-10 working days before start date
- 0% 11 or more working days before start date

A minimum enrollment exists. You may wish to purchase refundable airline tickets.
